- Random orbital polisher features superb engineering for a perfect finish
- Versatile 8mm dual action orbit for perfect polishing in any area
- Interchangeable backing plates: accepts 3", 5", and 6"
- Powerful 680W motor delivers precision power combined with the torque users demand

TORQX is the perfect first machine polisher for any detailing enthusiast or starting professional. The TORQX executes every detailing job quickly and easily, and with better results than by hand. TORQ engineers also placed the speed control dial in the middle of the body of the TORQX: right above the user's thumb during operation. Intuitive placement of speed controls keeps detailers focused on the job with adjustments easily made on the fly.

- Digital display and speed control buttons integrated for precise and intuitive control
- Powerful 700 watt motor provides smooth power delivery & start-up function at every speed setting
- Symphonic ergonomic lightweight construction with vibration reduction technology
- Interchangeable backing plates: accepts 3", 5", and 6" backing plates make it ideal for any job

The TORQ10FX Random Orbital Polisher takes detailing to the next level. Utilizing the 8mm throw that professionals and enthusiasts have used for decades TORQ combined it with the latest innovative technologies to create a revolutionary polishing machine. The TORQ10FX combines the ideal throw size with the speed and power necessary to rapidly correct imperfections. The TORQ10FX uses years of research to create a powerful machine with incredible correction abilities, and without compromise.

- 21mm long-throw orbital polisher rapidly removes swirls, scratches, & defects from painted surfaces
- Powerful 900 watt motor provides smooth power delivery & start-up function at every speed setting
- Superior engineering accepts 5" & 6" backing plates for extreme versatility
- Digital display and speed control buttons integrated for precise and intuitive control

The TORQ22D Random Orbital Polisher features a large 21mm throw for high performance detailing and paint correction. Because of superior engineering and Streamlined Integration (SI), the TORQ22D is the first large-throw machine polisher that accepts 5" & 6" backing plates without modifications. Professionals and enthusiasts can easily remove heavy swirls, scratches, and defects, apply wax, sealant, and glaze, or scrub carpets and upholstery on any size vehicle.
