BOSS | **BEST OF SHOW
SYSTEM™**

THE POWER TO ACHIEVE PERFECTION

BOSS | BEST OF SHOW SYSTEM™

We've reinvented the world of paint perfection. We call it the Best Of Show System, or just "BOSS." After testing every finish care system out there, I unleashed my team to go beyond great. They created BOSS, with components precisely designed to work together so it's simple to get that jaw-dropping finish we all seek. With BOSS, you can enjoy professional results with the confidence, ease, and consistency you've come to expect from Griot's Garage. Enjoy perfection.

Richard

Richard Griot

THE BOSS™

These tools are built right, using the best of the best. Packing 900 watts of muscle, THE BOSS long-throw orbitals are the most powerful on the market. Our rotating assembly is optimized by an advanced, precision-machined, steel counterbalance featuring NSK™ bearings; the best in the world. These attributes generate consistent torque regardless of user technique, encourage the fast pad rotation rates needed to power away the deepest defects, and ensure smooth, low-vibration operation.

CREAMS

You can tell the difference from the first drop. Our proprietary formulas are mixed and tested to do exactly what they say; fast correcting to mirror polishing, to sealing and protecting. With precisely calibrated loads of sub-micron abrasives that you won't find in any other product, these liquids empower you to achieve visibly better results in less time. Pair them with the appropriate BOSS pads and prepare to be amazed.

PADS

Our 8mm thick, low-profile BOSS buffing pads have been designed for unrivalled energy transfer and defect removal. Their low center of gravity and light weight improves tool stability and pad control for smoother operation. We use the highest quality reticulated foam, cut to our specifications. All BOSS pads feature a center intercooling hole designed to resist heat buildup at the center of the pad which eliminates common dishing and other pad component damage for extended pad life.

THE BOSS™

THE DIFFERENCE BETWEEN 15 AND 21 IS A LOT MORE THAN 6

Prepare for unparalleled polishing effectiveness. THE BOSS G15 has a 15mm orbit and THE BOSS G21 has a 21mm orbit. That's an 87% and 162% difference, respectively, in orbit throw between THE BOSS tools and a conventional 8mm orbital. This, combined with the powerful 900-watt motor, delivers consistent pad rotation. The rotating pad, working in conjunction with a long-throw orbit, effectively removes defects quicker than ever before. The G15 comes equipped to use our BOSS™ 5" pad system and is recommended for experienced enthusiasts or detailers. The more aggressive G21 is set up for our BOSS 6" pad system and is recommended for professional detailers.

15mm Orbital BG15 \$365
21mm Orbital BG21 \$385

PERFORMANCE, CONTROL, COMFORT

THE BOSS is the most innovative orbital ever. We are the first to integrate a fully variable speed trigger versus a common, on/off, toggle-type switch like the competition uses. This means you can throttle the tool from a dead stop to the maximum dial setting incrementally throughout the sweep of the trigger, acutely focusing the control you have over the tool.

BOSS™ CREAMS

ENGINEERED FOR SUPERIOR RESULTS

Our proprietary Best Of Show System™ formulas utilize specialized levels of sub-micron abrasives, which more efficiently remove defects and leave a highly-refined finish. Each formula is engineered with rich, high-lubricity, non-filling components to promote faster pad rotation so you can produce a true, concours-worthy finish in less time.

FAST CORRECTING CREAM

Packed with high loads of sub-micron abrasives, our BOSS Fast Correcting Cream makes quick work of removing the most severe defects, adding depth and clarity to your paint, and preparing it for perfecting or sealing.

Pint B110P \$24
Gallon B110G \$130

CORRECTING CREAM

Featuring sub-micron abrasives, our advanced formula BOSS Correcting Cream effectively eliminates moderate defects, adds depth and clarity, and allows for extended buff cycles that won't dust out, revealing a pristine, wax-ready finish.

Pint B120P \$24
Gallon B120G \$130

PERFECTING CREAM

Formulated with a balanced blend of sub-micron abrasives and polishing oils that provide extended play time, BOSS Perfecting Cream beautifies the finish by removing the most minute scratches, swirl marks, and hazing holograms.

Pint B130P \$20
Gallon B130G \$110

FINISHING SEALANT

Formulated with a unique blend of sub-micron abrasives, polishing oils, polymers and waxes and used for removal of fine to moderate surface defects. Flexible in its buffing pad pairing, this all-in-one formula delivers capable defect correction while imparting rich, deep, durable protection.

Pint B140P \$20
Gallon B140G \$110

BOSS™ PADS

INNOVATIVE PAD TECHNOLOGY = BETTER, FASTER, SAFER

Pads provide the contact patch between you and your paint finish. Just like racing tires gripping the track, this interaction is critical to success. Thinner, lighter, and with a cooling hole, they are available as a 5" or 6" system. The 5" system offers improved control, access to tighter areas, and faster pad rotation for increased defect removal. The 6" system delivers increased safety, controlled pad rotation, and more coverage per pass. THE BOSS™ G15 comes ready for the 5" system and the BOSS G21 comes ready for the 6" system, but either may easily be converted to the 5" or 6" system.

MICRO FIBER

This pad amplifies the effectiveness of our Correcting and Perfecting Creams for rapid removal of moderate to severe defects. Its plush nap reduces matting and maintains a dynamic cutting action while the foam interface improves conformability over vehicle contours.

5.5" (2-Pack) BMF5 \$26

6.5" (2-Pack) BMF6 \$30

FAST CORRECTING FOAM

Our most aggressive foam pad, this ultra-firm, euro foam pad is for use with Correcting Creams to remove moderate to severe defects.

5.5" (2-Pack) B110F5 \$23

6.5" (2-Pack) B110F6 \$28

CORRECTING FOAM

Not as aggressive as our Fast Correcting pad, this euro foam pad is rated as firm and should be paired with Correcting Creams to remove light to moderate defects.

5.5" (2-Pack) B120F5 \$23

6.5" (2-Pack) B120F6 \$28

PLUSH-NAP MICROFIBER

REDUCES MATTING AND
MAINTAINS DYNAMIC
CUTTING ACTION.

LOW-PROFILE PAD

ENSURES HIGH PAD
ROTATION FOR MAXIMUM
CORRECTION AND MORE
CONTROL.

CHAMFERED FOAM EDGE

MAXIMIZES FOOTPRINT FOR
INCREASED PRODUCTIVITY
AND FINISH PROTECTION.

TUNED FOAM INTERFACE

IMPROVES CONFORMABILITY
OVER VEHICLE CONTOURS.

PERFECTING FOAM

This medium firmness, multi-purpose foam pad is for use with Perfecting Cream to remove light scratches and defects for optimal depth and clarity.

5.5" (2-Pack) B130F5 \$23

6.5" (2-Pack) B130F6 \$28

FINISHING FOAM

Constructed from ultra-soft foam, this pad is for use with Perfecting Cream or Finishing Sealant to deliver optimal depth and clarity on the most delicate paint finishes.

5.5" (2-Pack) B140F5 \$23

6.5" (2-Pack) B140F6 \$28

INNERFLEX

Reduces the aggressiveness of the pad you use it with while adding a cushioning effect that helps the pad conform to body panel contours. It also helps reduce temperature buildup and extend pad life.

5" Innerflex Pad BIP5 \$14

6" Innerflex Pad BIP6 \$15

5" & 6" BACKING PLATES

Our vented backing plates are engineered as an integral part of our heat management system. They not only help extend the life of your pads, but their flexible urethane construction also enhances the pad's ability to conform to intricate body panels. More control means better results.

5" BG5BP \$24

6" BG6BP \$27

DETAILER'S BAG

Conveniently carry all of your BOSS™ gear in one convenient and comfortable bag. Our tough, stylish, and water-resistant Detailer's Bag is made from 600 denier nylon.

92221 \$69.99

D-HANDLE

This handle offers additional user control and comfort. It features energy dampening rubber grips and silicone energy dampening bushings.

BGDH \$20

RIGHT-ANGLE HANDLE

This handle can be installed on either side of THE BOSS™, according to your preference. It provides added control and comfort, and features an energy dampening rubber grip and mounting bushing.

BGRAH \$13

MIX 'N' MATCH VERSUS STEP-BY-STEP

Our Best Of Show System™ is not a 1-2-3 system, it's a much more flexible concept that allows you to get the perfect combination of pads and creams for the specific condition of your paint. The basic layout pairs pads and creams for the most common needs by color coding. With 4 liquids, 5 pad types (and our Innerflex cushioning pad) in 2 sizes, you have hundreds of unique combinations possible to address virtually every paint correcting, perfecting, and finishing scenario.

BOSS | BEST OF SHOW SYSTEM™

We've been laying down the law in Random Orbital polishing since 1992 and we're breaking new ground with the Best Of Show System (BOSS). The system is anchored by our new line of innovative THE BOSS™ long-throw Random Orbitals, and includes a line of proprietary pads and targeted creams. BOSS™ was created in-house from the ground up by our development team to deliver professional quality results with the ease and consistency you expect from your paint finishing system. If you're like me, you aim high when it comes to results... this system hits the bull's-eye every time. Enjoy perfection.
