

# AIR FORCE® **BLASTER®** SERIES

Now you can effortlessly dry an entire car in minutes without leaving micro scratches or water spots! Air Force® Blaster® car dryers use warm, dry, filtered air to safely blast water off expensive finishes and out of hard-to-reach places where no towel or chamois could ever reach. Perfect for getting water out of side-view mirrors, door jams, body seams, grills, lights, etc.

The Air Force Master Blaster features two twin-fan, 4.0 Peak Horsepower motors capable of delivering up to 58,000 feet-per-minute of clean, dry, warm, filtered air!

Each motor is controlled by a separate switch that allows you to select from three different airflow and temperature levels up to 60° above ambient.

## FEATURES

- Touchless drying with no afterstreaking™
- Does not remove wax
- Dries car in 15 minutes or less
- Prevents rust and eliminates water spots
- Better/safer than compressed air or leaf blowers
- Safe for expensive paint and chrome
- Rugged all-steel construction built to last
- Four Blaster® models to fit any budget

## Air Force® Blaster® Classic

With a body of steel and a powerful twin-fan, 4.0 Peak Horsepower motor, the Blaster Classic produces 29,250 feet-per-minute of warm (30° above ambient), dry, filtered air that cuts drying time by as much as 70%. And, because nothing but air touches the finish, it is completely safe for older classics and expensive customs. It's great for motorcycles too!

## Air Force® Blaster® SideKick®

The Blaster SideKick is an affordable, high-performance, portable car or motorcycle dryer. It features an unbelievably powerful 1.3 Horsepower motor that pumps out 18,000 feet-per-minute of warm (30° above ambient), dry, filtered air, yet at a mere 9.5" high it is small enough to stow away in the trunk for quick, on-site show touchups and detailing.
