

NOW BETTER THAN CLAY!

Works 3 Times Faster with

Advanced Polymer Technology™

6" Foam Pad

- Lasts up to 4 times longer than clay bars
- For a flawless "show room perfect" shine
- Glides on & off easily for a slick finish
- If inadvertently dropped on shop floor, simply rinse clean

NANOSKIN AUTOSCRUB System works fast and achieves professional results with the new advanced rubber polymer technology, which replaces the use of clay bars. With dual action orbital polisher, it safely and easily removes paint over spray, water spots, tree sap, rail dust and other bonded surface contaminants from the surface of automotive paint, glass, moldings and plastic. AUTOSCRUB works great with GLIDE Instant Detail Spray lubricant. Unlike the clay bar, the AUTOSCRUB can be cleaned by simply rinsing off the accumulated contaminants with water. If you drop the AUTOSCRUB on the ground, no worries, just rinse the sponge pad clean and you're ready to keep using it. Easy glides allows for sturdy and controlled handling, unlike clay bars where constant reshaping is required.

DIRECTIONS:

Use ONLY on clean, cool paint and out of direct sunlight. DO NOT work on the surface over 100°F.

1. Thoroughly wash vehicle free of dust, sand, and dirt.
2. Dilute GLIDE to desired strength. (2 oz. makes 16 oz. RTU.)
3. Mist sufficient GLIDE onto the surface evenly.
4. Polish the surface with dual action orbital polisher using light pressure (Low Speed).
5. Wipe off residue and apply wax or glaze.

NOTE: Using with 6" soft-edge DA pad is highly recommended.

Sufficient lubrication is crucial to the AUTOSCRUB application.

Plain water is NOT an adequate lubricant.

DO NOT use with rotary polisher.

Total Import Solutions is not responsible for the misuse of this product or if the product is used in any other way than directed.

There is a significant difference between NANOSKIN AUTOSCRUB and clay bars. An outstanding machine/advanced polymer combination makes AUTOSCRUB the best contamination removal tool ever.

Compare with clay bars:

	NANOSKIN AUTOSCRUB	Traditional Clay Bars
Application Tool	DA Orbital Polisher	Hand
Durability	50~80 times	10~15 times
Washable	Yes	No
Temp. Sensitivity	Low to Medium	Medium to High
Use with Lubricant	Yes	Yes
Overspray	Fast to remove	Slow to remove
Brake Dust	Fast to remove	Slow to remove
Rail Dust	Fast to remove	Hard to remove
Industrial Pollution	Fast to remove	Slow to remove
Reshape	Not required	Required
